

Nera SatCom adds Inmarsat-C to its range.

Nera Satcom AS has re-introduced Inmarsat-C products to its range of maritime mobile satellite communication products. The popular and successful Saturn C was withdrawn from production some time ago but now there is a successor. The NERA C and NERA MINI C are now available for immediate supply.

The NERA C provides full coverage of Inmarsat-C services. It is a Class 2 Inmarsat-C ship earth station which complies with all relevant IMO and IEC requirements. It can therefore be fitted on board any class of vessel, GMDSS or otherwise. Services supported:-

EGC receiving (Safety & FleetNet).

Distress message handling.

Two-way, digital store and forward message handling:- Telex, e-mail, fax, X25, X400.

Closed network DNID.

Special access codes.

Position reporting and polling.

Data reporting.

The Nera Mini C is a low power compact communication system for small vessels such as fishing vessels and yachts. The Mini-C offers two-way messaging and e-mailing, position reporting polling and ship to ship communications. This makes the Mini-C an ideal inexpensive solution for basic messaging, tracking, and security applications both maritime and land based.

Ship Security Alerting (SSAS) facilities can be incorporated in either unit

Nera SatCom AS products are distributed in Southern Africa by SMD Telecommunications CC
